## CAREER OBJECTIVE

Highly innovative and performance-driven Full Stack Developer with expert experience designing, building, and deploying scalable web and mobile ecosystems. Adept at transforming complex business requirements into elegant production-grade software using the modern JavaScript/TypeScript lifecycle. Passionate about cloud-native infrastructure, system integration, and micro-frontend development. Seeking an engineering role in a forward-thinking global team to deliver secure, industry-compliant solutions.

## TECHNICAL SKILLS

| | |
|---|---|
| **Frontend:** | React.js, Next.js, TypeScript, JavaScript (ES6+), React Native, Ionic, Redux Toolkit, Context API, Tailwind CSS, Shadcn/ui, Material-UI (MUI), Ant Design |
| **Backend & APIs:** | Node.js, Express.js, Prisma ORM, Mongoose, RESTful APIs, Microsoft Graph API, GraphQL, WebSockets |
| **Databases:** | PostgreSQL, MongoDB, Firebase Realtime Database |
| **DevOps & Cloud:** | CI/CD Pipelines, Azure DevOps, Git, GitHub Actions, Docker, Vercel, Netlify, Render, Firebase Hosting |
| **Key Competencies:** | Role-Based Access Control (RBAC), Secure Payments (Stripe), SaaS Architecture, Enterprise Dashboards |

## PROFESSIONAL EXPERIENCE & PROJECTS

### Enterprise Admin & DevOps Infrastructure Platform

Jan 2025 – Present

***Tech Stack: React.js, TypeScript, Node.js, Firebase, Azure DevOps, RTK Query, Stripe, Material-UI***

- Engineered high-performance enterprise admin panels managing internal employee data schemas, status updates, and robust multi-role client-side routing.
- Designed and implemented a dynamic structural layout and state framework using Material-UI to visually manage and control complex organizational data records.
- Integrated Microsoft Graph API and SharePoint services natively to safely retrieve and update business-critical corporate assets.
- Automated deployment procedures through specialized Azure DevOps CI/CD pipelines, optimizing microservice container delivery and production uptimes.

**Healthcare Management & Omni-Channel Booking System** Feb 2024 – Dec 2024

***Tech Stack: Next.js, React.js, Node.js, Express.js, Prisma ORM, PostgreSQL, Firebase Auth, Stripe***

- Architected an end-to-end medical scheduling ecosystem supporting custom workflows for patient authentication, doctor assignment, and status flows.
- Maximized database efficiency using Prisma ORM with relational PostgreSQL, constructing clean migrations and custom indexing for lower query latency.
- Implemented Stripe payment portals coupled with webhook processing for seamless e-commerce transactions and product checkout pipelines.
- Ensured cross-platform visual synchronization with responsive UI design patterns, using TanStack Query for optimal client-side caching.

## EDUCATION

**Sherpur GOVT College — Post Graduate Degree** Graduated: 2026

## CERTIFICATIONS

**Complete Web Development Course — Programming Hero** Completed: 2026

## CORE STRENGTHS

- **Modern State Management:** Advanced expertise utilizing Redux Toolkit (RTK Query) and TanStack Query for zero-friction data pipelines.
- **Enterprise Integrations:** Hands-on specialization connecting cloud services like Microsoft Azure, Graph API, and SharePoint seamlessly.
- **Production DevOps Culture:** Proven capabilities configuring professional CI/CD pipelines, repository automated tasks, and Docker deployment.
